ONE INDIAGANDHIDHAM AND MUNDRA TREE PLANTING ACTIVITY WITH ROTARY CLUB OF GANDHIDHAM

As part of ONE India's Environment protection, conservation and sustainability initiative, ONE INDIA GANDHIDHAM AND MUNDRA joined hands with Rotary Club of Gandhidham and carried out Tree plantation activity at Rotary Forest of Gandhidham with all colleagues and participants of the Rotary club.

Rotary Forest, part of Rotary Club of Gandhidham, has vast land measuring 31 acres and is also developing a forest along with a beautiful lake for water conservation and a walking track for the citizens of Gandhidham. The Club have a milestone of reaching 1,00,000+ plantation and have already completed 60,000 tree plantation. ONE India Gandhidham & Mundra as part of its CSR environmental sustainability initiatives took the opportunity to participate in the contribution of tree plantation and raising the awareness of sustainability.

ONE India Gandhidham and Mundra team planted 200 plants under guided supervision covering different biological species of plants and learnt about types of trees / soil / irrigation and also about the flora and fauna of the forest area.

Afforestation is one of the best ways to help our environment rebuild itself, as we all know more trees will absorb more carbon dioxide, thus slowing down climate change, boost biodiversity, conserve rainwater and improve health and well-being. ONE India will always encourage and religiously practise and participate in making a clean, green and sustainable environment.
